

Member Follow Up

Following up on the Member Heads Up from November 23, 2017

Follow Up	On November 23, BILD Alberta sent a Member Heads Up asking for volunteers to review proposed code changes to the 2020 National Codes.
Member Response	15 members representing single-, multi-family and the plumbing trade responded to assist in the code review. Reviewing the proposed Code changes provided an opportunity to support and supply suggestions that were relevant to Alberta and other jurisdictions before they were adopted into the National Codes
Outcome	• 124 of the 131 proposed changes were reviewed in depth by the volunteers - Those that were not reviewed in depth were related to heavy industry or the removal of asbestos references • No significant changes to current construction or practice were flagged for comment • Several minor changes that would enhance clarity were flagged - Comments were provided to National Research Council and shared with CHBA National
Next Steps	BILD Alberta will track the outcome of the suggested changes in partnership with CHBA National and communicate the outcome to members.
